

10 Tips

To Keep Pests Away

There are 3 things pests need to survive: Food, Water and Shelter.

When these are available, it's a welcome sign for pests to come right on in! Follow these tips and pests will naturally find other places to hang out.

1. Food is a major attraction! Keep food in sealed containers.
2. Cleanup crumbs on countertops, stovetops, floor and rugs.
3. Don't leave pet food out.
4. Put all open beverages away or keep them in closed bottles.
5. Don't leave water in sinks and tubs.
6. Remove clutter - it makes a good hiding place.
7. Boxes (especially cereal boxes) attract roaches. Enclose in plastic.
8. Keep trash in a tightly closed container and take it out daily.
9. Find out where pests are entering and seal openings.
10. Learn about the pests you have and options to control them.

It's True: A mouse can fit through a dime-size hole!

Bonus Tip

Did you know that hand sanitizers, anti-microbial and soaps and wipes are actually pesticides? Studies show that natural soap and water works just as well - without the adverse effects!
